We're from **Montréal, Canada** 🇨🇦

Our Inspiration

Globally, we waste about **1.4 billion** tons of food every year.

Food and agriculture Organization (FAO) of the United Nations (UN)

More than **80 % of Americans** discard perfectly good, consumable food simply because they misunderstand expiration labels.

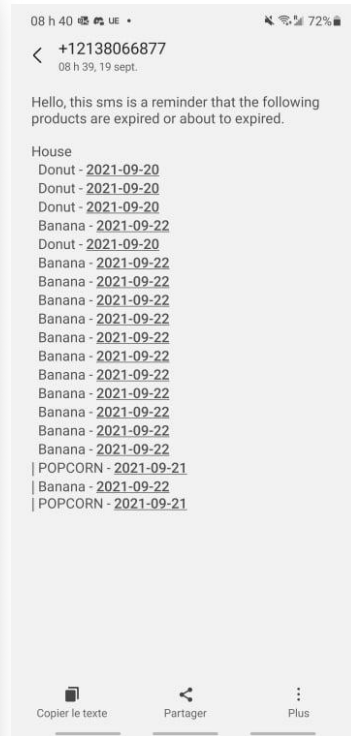

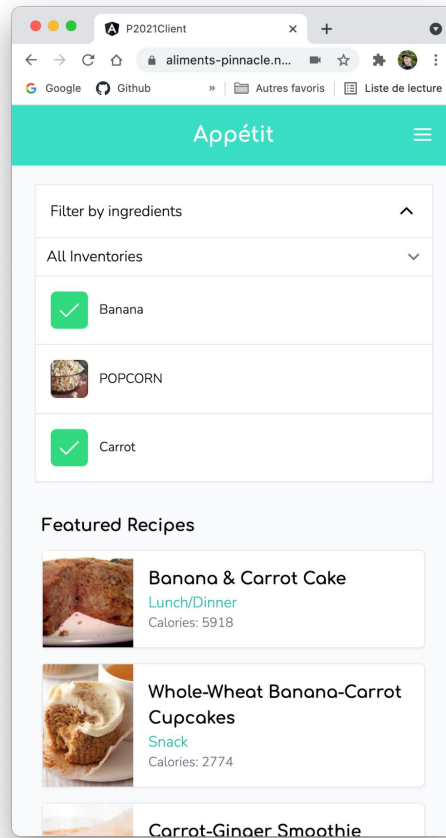

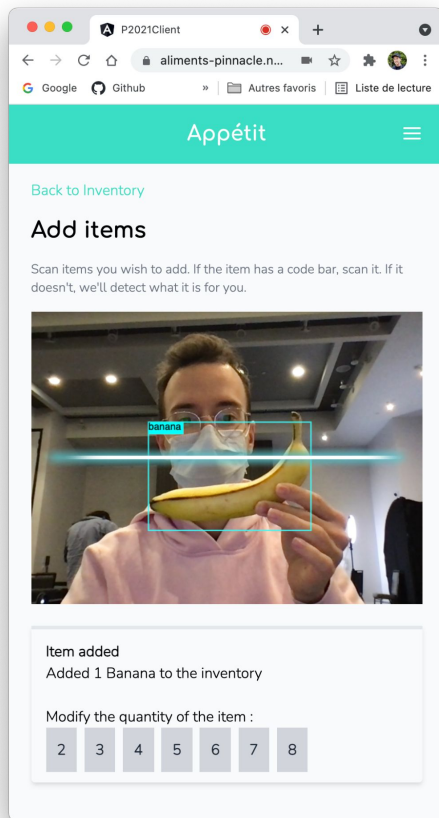

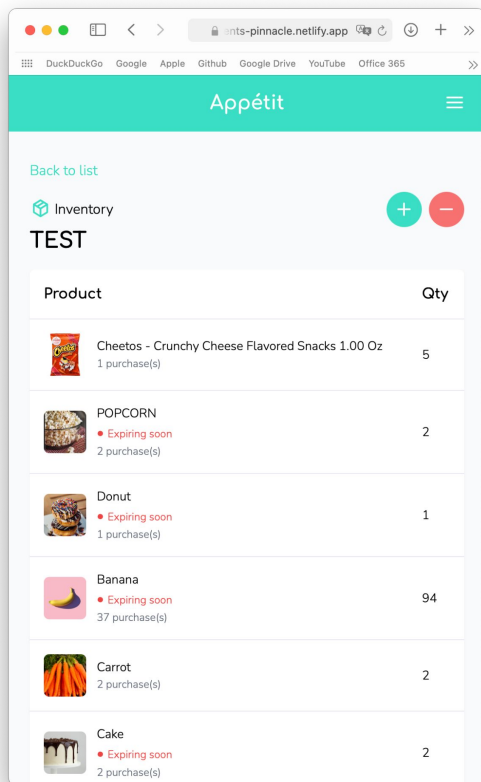

Our Inspiration

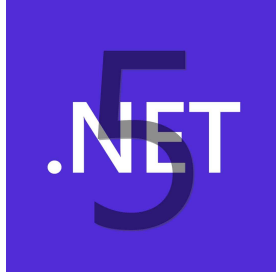

We were searching for an **easy** and **convenient** way to help people be more aware of food waste and to encourage them to cook more.

Our Solution

Technologies

Demo Time !

Design challenges

- How to manage the food inventory with an easy user experience ?
- How can we help users avoid wasting their soon-to-expire food?
- How to scan for food that doesn't have a UPC barcode?
Or foods that don't have a printed expiration date?
 - How to detect complex food types

What's next for Appétit

- Improvement of the object recognition model.
- Send notifications with recipes suggestions.
- Improve quantity management for items containing sub-items.

Thank you
&
Bon Appétit !
